- Cloud Computing
- DevOps Automation
- Hands-on Technology Projects
- Continuous Learning
- Yoga & Wellness

Meenakshi Kandwal

Junior Azure DevOps Engineer with hands-on experience gained through professional training and practical projects in Azure, Azure DevOps, CI/CD pipelines, Docker, Kubernetes (AKS), Terraform, Jenkins, Git, Linux and Infrastructure as Code. Experienced in building automated CI/CD pipelines, containerising applications, deploying workloads to Azure App Service and AKS, integrating security and code-quality tools, and troubleshooting cloud deployment issues. Microsoft Azure Fundamentals (AZ-900) certified, with a strong background in administration, finance and stakeholder communication, now transitioning into a Cloud and DevOps engineering career.

EXPERIENCE

Azure Cloud Administrator

Saigates Ltd - Wolverhampton, England

- Support administration of Azure resources including VMs, Storage Accounts, Resource Groups and basic networking.
- Manage Microsoft Entra ID users, groups and RBAC permissions for secure resource access.
- Monitor Azure resources through Azure Portal and Azure Monitor, investigating basic alerts and availability issues.
- Support Azure Storage, VNet, subnet and NSG configuration and troubleshooting.
- Use Azure Portal and Azure CLI for routine administration, resource checks and access management.
- Resolve user access and cloud-related support requests and maintain technical documentation.

System Administrator

M.R. Dental Limited - Woking, Surrey

- Provided day-to-day IT support, resolving hardware, software, login and connectivity issues.
- Managed user accounts, permissions, email access and password resets.
- Supported Windows devices, printers, shared drives and office IT equipment.
- Assisted with software installation, updates, system maintenance and basic network troubleshooting.
- Maintained IT documentation, access records and supported backup and security procedures.

Azure Cloud Engineer (Remote)

Job GKG Web Services Inc - United States

- Supported Azure VMs, Storage Accounts, Resource Groups and Virtual Networks.
- Managed Entra ID users, groups and RBAC permissions.
- Assisted with VNet, subnet, NSG and connectivity configuration.
- Monitored Azure resources and alerts using Azure Monitor.
- Used Azure Portal and Azure CLI for routine administration and troubleshooting.

PROJECTS

1. Azure DevOps CI/CD – .NET Application

Azure DevOps | YAML | Docker | ACR | Azure App Service | SonarCloud

- Built a YAML-based CI/CD pipeline for a .NET application using Azure DevOps.
- Containerised the application using Docker and pushed images to Azure Container Registry (ACR).
- Deployed the application to Azure App Service and integrated SonarCloud for code-quality analysis.
- Troubleshoot pipeline, service connection and deployment issues.

2. Terraform

Infrastructure as Code – Azure/AKS

Terraform | Azure DevOps | AKS | VNet | ACR

- Developed reusable Terraform modules to provision Azure infrastructure including AKS, VNet and ACR.
- Implemented Terraform Init, Validate, Plan and Apply stages through Azure DevOps pipelines.
- Worked with remote Terraform state, Azure service connections and AKS infrastructure provisioning.

3. Jenkins CI/CD –

Spring Boot to AKS

Jenkins | Maven | Docker | ACR | AKS | Trivy | Git

- Built a Jenkins CI/CD workflow for a Spring Boot application using Maven, Docker and Git.
- Integrated Trivy vulnerability scanning into the CI/CD pipeline.
- Built container images and worked with deployment

EDUCATION

2022

Diploma of Higher Education Level 7 postgraduate diploma in international business and management

University for the Creative Arts - Epsom, SRY, UK

2013

Bachelor of Commerce (BCom) - Honours Business, Accounts, and Finance

Hans Raj College, Delhi University - New Delhi India, India

workflows targeting Azure
Kubernetes Service (AKS).

4. Node.js Azure DevOps Pipeline

*Node.js | Azure DevOps |
Snyk | Docker | Azure*

- Built an Azure DevOps CI/CD pipeline for a Node.js application using npm and Docker.
- Integrated Snyk vulnerability scanning into the pipeline.
- Worked with Azure service connections and container/application deployment.
- Troubleshoot pipeline, security-scanning and deployment issues.
